## Heat Defiant Wig Care

Recommended to shampoo every 6-10 wears. Touch up your heat defiant wig every day to keep the ends smooth and in shape. Creams, pastes, oils and luster sprays will give your wig texture and movement for a natural looking hair style.

**Shampoo:** brush your wig before shampooing. Rinse with luke warm water then apply shampoo to the inside cap and hair, gently massaging in one direction. Rinse. Repeat if needed.

**Conditioner:** apply to wet hair. Comb through the hair using a wide tooth comb. Allow the conditioner to stay on for 5-10 minutes. Rinse thoroughly. Place wig in a towel to absorb the excess moisture. Remove from towel and gently comb with wide tooth comb.

**Dry and Style:** Allow your HD fiber to air dry completely in style. Once dry it is ready for hot styling tools.

**Curling irons/Flat irons/Hot rollers** keep temp no more than 350F. Keep the hot tool 1 inch away from the base of your wig. Allow the hair to cool before combing. Lightly spray with hair spray.

**Blow drying:** for finishing touches, use a metal barrel brush on the bangs and ends to help smooth or roll under. Allow your wig to cool completely before combing the style out.
