## Human Hair Wig Care

Recommended shampoo every 6-10 wears

**Shampooing:** brush your wig before shampooing. Rinse under luke warm water then apply shampoo to the inside cap and hair. Massage shampoo in one direction. Rinse. Repeat if needed.

**Conditioner:** apply conditioner to wet hair. Comb through using a wide tooth comb in one direction. Allow the conditioner to stay on the hair for 5-10 minutes. Rinse out thoroughly. Place your wig in a towel to absorb the excess moisture for 5-10 minutes.

**Drying / Styling:** comb hair into shape then allow to air dry for a while. Blow drying is to done to smooth ends and give lift where needed. Only use hot tools when the hair is COMPLETELY dry! All types of hot tools can be used including: flat and/or curling irons, hot rollers, etc. Finishing touches can be done while wearing your wig. To keep up your style, a touch up a couple days later is highly recommended. Enjoy styling your hair! This is the beauty of human hair!

**Products:** use only professional products on your human hair at all times! Gels, creams, mousses, texture and hair sprays should/ can be used to keep your hair style in shape, protect the hair, and prolong the quality of the hair.
