## Synthetic Fiber Wig Care

Recommended to shampoo every 6-10 wears

**Shampoo:** brush your wig before shampooing. Rinse under luke warm water before applying shampoo. Apply shampoo and massage the inside of the wig. Then massage shampoo through the hair in one direction. This will help eliminate tangles and make it easier to style. Rinse. Repeat if needed.

**Conditioner:** apply conditioner to wet hair and comb through using a wide tooth comb. Leave the conditioner on for 3-5 minutes. Rinse thoroughly. Conditioner will prevent static and will keep the fiber soft and manageable.

**Drying and styling:** allow your wig to air dry naturally by placing it on your mannequin head. Drying can take up to 24 hours. Velcro rollers can be used to give additional shape if needed. Once completely dry, shake the wig and use your hands and wide tooth comb to style it into shape.

**Products:** apply products to dry hair to give texture, hold and shine. Go ahead and give your hair style its finishing touches!!

\*\*\*\*\*ABSOLUTELY NO HEAT ON  
REGULAR SYNTHETIC FIBER!!!! \*\*\*\*\*
